## OBJECTIVE

Results-driven Java Full Stack Developer with practical experience building scalable REST APIs, full-stack web applications, and AI-integrated platforms using Java, Spring Boot, Spring Security, React, MySQL, and Docker. Demonstrated ability to deliver end-to-end solutions — from secure JWT-based authentication to Groq AI-powered features. Seeking a challenging role to contribute impactful, production-ready software and grow within an innovative engineering team.

## PROFESSIONAL EXPERIENCE

### Product Engineering Intern — New Vision Softcomm, Bhopal

Jun 2026 – Aug 2026

- Engineered and deployed 8+ production-grade REST APIs using Spring Boot, reducing average backend response time by ~30%.
- Designed relational database schemas in MySQL; wrote optimized queries improving core business logic performance across 3 modules.
- Implemented JWT-based authentication and role-based authorization using Spring Security, eliminating unauthorized access vulnerabilities.
- Resolved 15+ critical bugs and contributed 4 new features through cross-functional Agile/Scrum sprint collaboration.
- Built and maintained project using Maven for dependency management; containerized services with Docker for consistent deployments.

## EDUCATION

### Bachelor of Technology — Computer Science and Engineering

Expected 2027

Shree Ramswaroop Memorial University, Lucknow, India • CGPA: 7.8 / 10

## TECHNICAL SKILLS

|                            |                                                                                               |
|----------------------------|-----------------------------------------------------------------------------------------------|
| <b>Languages:</b>          | Java, C                                                                                       |
| <b>Backend:</b>            | Spring Boot, Spring Security, Spring Data JPA, Hibernate, REST API, JWT Authentication, Maven |
| <b>Frontend:</b>           | React.js, HTML, CSS                                                                           |
| <b>Database:</b>           | MySQL, JDBC                                                                                   |
| <b>DevOps &amp; Tools:</b> | Docker, Git, GitHub, Postman, IntelliJ IDEA, VS Code                                          |
| <b>Testing:</b>            | JUnit, Mockito                                                                                |
| <b>AI Integration:</b>     | Groq AI API                                                                                   |
| <b>Concepts:</b>           | Layered Architecture (MVC), CRUD, Role-Based Access Control, OOP, Agile/Scrum                 |

## PROJECTS

### DevForge | Spring Boot, React, MySQL, Groq AI, Docker, Maven

- Architected a full-stack developer productivity platform with AI-powered mock interviews customized by company and difficulty level.
- Integrated Groq AI API for dynamic, context-aware interview question generation tailored to the user's tech stack.
- Built GitHub profile integration and Codeforces/LeetCode dashboard to display competitive programming rankings.
- Developed responsive React.js frontend with Spring Boot REST backend, MySQL persistence, and Docker containerization.

### Employee Management System | Spring Boot, React, Spring Security, JWT, MySQL, Maven

- Delivered a full-stack EMS with React dashboard and Spring Boot REST API backend.
- Implemented role-based access control (Admin, Manager, Employee) using Spring Security and JWT authentication.
- Built admin panel for CRUD operations on employee records with real-time UI updates; validated service logic with JUnit & Mockito.

## CERTIFICATIONS & ACHIEVEMENTS

- Java Programming Certification — HackerRank
- Problem Solving Certification — HackerRank | SQL Advanced Certificate — HackerRank
- Cyber Security Certificate — Udemy
- Smart India Hackathon — Participation Certificate — Government of India
